EXPERIENCE

Adikteev

Analytics Engineer

Dec 2024 - Jun 2025, Paris, France

AdTech company providing mobile app user acquisition and re-engagement solutions.

- Designed 5+ SQL report templates and productized as scheduled Airflow deliveries; automated multi-step manual reporting workflows for 10+ Sales/Revenue users across daily, weekly, and monthly cycles.
- Owned L2 technical support for Revenue/Sales teams (~20 users), resolving 10+ data/operational tickets weekly; built 30+ FAQ knowledge base entries and established escalation workflows with CPO.
- Built end-to-end Airflow pipeline ingesting ~10K daily ad-event records from client Dropbox; automated validation and delivery, replacing manual Excel-based workflow.

Adikteev

Analytics Engineer Intern

Jun 2024 - Dec 2024, Paris, France

- Built 10+ custom audience segmentation pipelines (SQL + Python + Airflow); maintained 100+ active audiences supporting 200+ campaign launches for Revenue team.
- Diagnosed tracking-link and data discrepancies with 3+ MMP partners (Singular, Adjust, AppsFlyer); conducted root-cause analysis and coordinated fixes across internal and external teams.
- Maintained 15+ production pipelines (Airflow + cron); implemented error-handling logic reducing manual intervention during failures.

PROJECTS

Stock Price Prediction ML Platform

Personal Project | [GitHub Repository](#)

End-to-end ML pipeline predicting next-day stock price direction using EOD market data; focused on reproducibility, data quality, and production-ready patterns.

- Engineered 30+ features (returns, lags, rolling stats, RSI, MACD, SMA) with time-series split to prevent data leakage; trained CatBoost classifier tracked via MLflow.
- Implemented data validation (Great Expectations, 15+ expectations) and feature store (Feast) with point-in-time correct joins for training data retrieval.
- Built FastAPI serving layer integrating MLflow Model Registry (champion/challenger promotion) and Feast online store for real-time feature retrieval.
- Developed 13+ pytest modules with synthetic fixtures; designed for CI/CD integration.

SUMMARY

Analytics Engineer experienced in building data pipelines, SQL reporting, and internal tooling in AdTech. Delivered automated reporting solutions for Sales/Revenue teams and owned technical support across 20+ stakeholders. Skilled in Python, SQL, and Airflow; focused on turning data into actionable insights through reliable, scalable workflows.

EDUCATION

EPITA

Paris, France

Master of Science - Computer Science

GPA: 16.11/20

USTH

Hanoi, Vietnam

Bachelor of Science - Cyber Security

SKILLS

Programming	Python, SQL
API	FastAPI
Data Handling	Pandas, Numpy
Data Validation	Great Expectations
Data Warehouse	Redshift
Query Engine	Trino
OS	macOS, Linux
CI/CD	Docker, Github, Github Actions
Cloud	AWS
Misc.	Airflow, Hive
Soft Skills	Autonomous, Rigorous

LANGUAGES

- English - C1
- French - B1+
- Vietnamese - Native
